About Me

I create AI-assisted videos focused on visual storytelling, science-based ideas, mystery concepts, and short-form engaging content. My work combines concept development, script shaping, prompt writing, AI-generated visuals, and editing to turn ideas into watchable video content.

Through my YouTube channel, ScienceRush, I have published a growing body of AI-assisted videos built around curiosity, cinematic presentation, and hook-driven storytelling. The publicly indexed channel currently shows around 130 subscribers and 78 videos.

What I Do

- AI-generated visual storytelling
- Short-form video concept creation
- Prompt writing for image and video generation
- Cinematic scene design
- Science and mystery explainer visuals
- YouTube content packaging and presentation
- Editing for engaging, fast-paced viewer retention

Content Style

My work leans toward:

- science and curiosity-driven content
- mystery and thought-provoking concepts
- cinematic AI visuals
- short, strong hooks built for YouTube viewing

Publicly indexed examples from the channel include videos around time dilation, the Philadelphia Experiment, and psychologically intriguing concepts like why the past feels cleaner than it was. This suggests a content style built on curiosity, narrative framing, and audience hooks.

Selected Work

1) Science Explainer Content

Created short-form AI-assisted videos built around scientific ideas and mind-bending concepts, including relativity-style themes such as time dilation.

Role: concept development, prompt writing, visual planning, editing.

2) Mystery / Historical Concept Videos

Produced curiosity-based visual explainers around unusual historical topics such as the Philadelphia Experiment.

Role: research framing, visual concept generation, AI-assisted storytelling, edit flow.

3) Psychology / Curiosity Shorts

Worked on thought-provoking short videos using emotionally sticky hooks and simple narrative framing, including topics like memory and perception.

Role: hook writing, AI visual planning, short-form editing, narrative pacing.

4) Saanvi & Priya - Sample Comic Book

A short sample comic PDF featuring two characters, Saanvi and Priya, moving through a simple mall-shopping story. It shows character-based storytelling, sequential comic layout, speech-bubble placement, and AI-assisted visual continuity across pages.

Role: story concept, character setup, prompt writing, panel planning, speech-bubble layout, PDF comic assembly.

5) Onam Design Work - Food Festival Instagram Post

A social media poster design for an Onam Food Festival, using a warm red-and-brown festive visual style. The design is suitable for Instagram promotion and demonstrates layout sense, cultural festival styling, typography placement, and event-poster presentation.

Role: poster concept, social media layout, color styling, typography arrangement, design finishing.

Tools & Workflow

- ChatGPT for ideation, scripting, and prompt development
- AI image / video generation tools including Sora 2 and Grok
- Editing and design tools for short-form content production including CapCut and Canva
- YouTube publishing workflow

Strengths

- Turning abstract ideas into visual content
- Building engaging hooks for Shorts and short videos
- Combining science, mystery, and storytelling
- Using AI tools creatively for faster ideation and execution
- Creating content that feels cinematic and curiosity-driven
- Designing simple visual samples for portfolio presentation
